Education

2025 - Current
Singapore Management University
Software Engineering

2021 - 2024
Republic Polytechnic
Industrial and Operations Management

Technical Skillsets

- Python
- JavaScript (Node.js)
- React JS | Next.js
- Uipath Automation
- LLM applications
- Prompt Engineering
- SQL
- MongoDB
- Databricks
- Power BI
- n8n

Soft Skillsets

- Project Management
- Process Improvement
- Data Analysis
- Problem Solving
- Leadership
- Critical Thinking

Language

English | Chinese

Working Experience

Stellar
Automation Engineer (Sept 2023 - Nov 2024)

- **WhatsApp-HubSpot Integration**: Built a Chrome extension to streamline WhatsApp data integration with HubSpot, optimizing data management for advisors.
- **Task Tracker**: Designed a user-friendly task tracking tool as an alternative to Clockify, improving task tracking efficiency in HubSpot.
- **Data Pipeline & Dashboard Development**: Utilized Databricks to ingest and clean data, followed by creating an interactive Power BI dashboard to visualize and analyze the processed data.
- **Knowledge Base with LLM**: Leveraged OpenAI API to build a knowledge base for enhanced support resources.

Starboard SG
Operation Assistant (Sept 2022 - Nov 2022)

- Slack Bot Development: Created a bot to query databases and update the app's homepage, providing visibility on outstanding tasks.
- Technical Skills Growth: Tackled new programming challenges, gaining proficiency in Flask and Python.
- Collaboration & Communication: Strengthened teamwork skills through effective communication and collaborative problem-solving.

Projects

PromptDocker - AI Prompt Management Platform
- Built a SaaS platform to store, test, and deploy AI prompts via API for automation workflows (e.g., n8n)

AI Sales Agent
- Developed an AI-powered sales assistant trained on historical sales conversations and pricing data
- Implemented embeddings + vector search to retrieve relevant context and generate accurate responses

GitLens - Project Onboarding Platform
- Created a project onboarding tool that indexes repositories, enabling semantic search, dependency visualization, and code understanding.

Achievements & Awards

- **RP Scholarship Award**
- **NUS MIEC 2022 (1st Runner Up)**
- **National IIOT Competition 2023 (1st Runner Up)**
- **RP director roll of honour**
