Zhao Xinlei

AI Automation Engineer | Software Engineer

Builder focused on AI agents, automation systems, and scalable data workflows. Experienced in deploying LLM-powered applications and integrations that reduce manual work and drive operational efficiency.

Working Experience

Stellar

Automation Engineer (Sept 2023 - Nov 2024)

- **WhatsApp-HubSpot Integration**: Built a Chrome extension integrating WhatsApp with HubSpot CRM, reducing manual data entry by ~60% for advisors
- **Task Tracker**: Designed and deployed a custom task tracking system (alternative to Clockify), improving internal task visibility and workflow efficiency
- **Data Pipeline & Dashboard Development**: Developed a data pipeline using Databricks to ingest and clean operational data, and built Power BI dashboards for real-time analytics
- **Knowledge Base with LLM**: Created an LLM-powered internal knowledge base using OpenAI API, improving support response speed and knowledge accessibility

Starboard SG

Operation Assistant (Sept 2022 - Nov 2022)

- **Slack Bot Development:** Developed a Slack bot using Flask and Python to automate database queries and task tracking
- **Data Visualization:** Improved team productivity by centralizing visibility of outstanding tasks on internal dashboards
- **Workflow Optimization:** Collaborated cross-functionally to identify workflow bottlenecks and implement automation solutions

Projects

PromptDocker - AI Prompt Management Platform

- Built a SaaS platform to store, test, and deploy AI prompts via API for automation workflows (e.g., n8n)

AI Sales Agent

- Developed an AI-powered sales assistant trained on historical sales conversations and pricing data
- Implemented embeddings + vector search to retrieve relevant context and generate accurate responses

GitLens - Project Onboarding Platform

- Created a project onboarding tool that indexes repositories, enabling semantic search, dependency visualization, and code understanding.

Achievements & Awards

- **RP Scholarship Award**
- **NUS MIEC 2022 (1st Runner Up)**
- **National IIOT Competition 2023 (1st Runner Up)**
- **RP director roll of honour**

Education

2025 - Current
Singapore Management University
Software Engineering

2021 - 2024
Republic Polytechnic
Industrial and Operations Management

Technical Skillsets

- Python
- JavaScript (Node.js)
- React JS | Next.js
- Uipath Automation
- LLM applications
- Prompt Engineering
- SQL
- MongoDB
- Databricks
- Power BI
- n8n

Soft Skillsets

- Project Management
- Process Improvement
- Data Analysis
- Problem Solving
- Leadership
- Critical Thinking

Language

English | Chinese
